

Bags, Tunnel, Sheaths

Customized **Accessories**
for **Isolators**, RABS, Gloveboxes

BAGS

FILTER BAGS

TUNNELS

SHEATHS

Unique performance

Flexible and weldable plastic accessories, these objects are used for the storage and transfer of products, materials and substances from an environment specific to an environment difficult, or vice versa. Thanks to perfect mastery of construction, the airlock of the containment space is guaranteed.

Controlled manufacturing
guarantees a perfect airlock

Protection of operators,
safety of preparations
and installations

Compatible to many solutions
of depollution, asbestos removal
and deconstruction

Environmental Protection
when transferring products
or materials

Areas of application

HEALTH - PHARMACEUTICAL

HEALTH - HOSPITAL

VETERINARY

UNIVERSITY - RESEARCH

NUCLEAR

FOOD INDUSTRY

Flexible Containment Accessories: available options

Materials

PVC

PUR

EBA/EVA

BAGS

PIERCAN has a **wide range of bags**. These bags are assembled by **high frequency welding**, but can be sealed by thermal pulse.

"B TO G" BAG: STANDARD SHAPE
with or without seal

BAG "B TO G": "BOTTLE SHAPE"

"ZIP" BAG

BAG IN FOUR: AZURED COLOR

BAG IN FOUR: RED COLOR

FILTER BAG WITH BELLOWS

BAG "B TO G" *with or without seals; round bottom (FR)*

FILTER BAG WITHOUT BELLOW

TUNNELS

The tunnels may have one or two O-rings. They are made of extruded, calendered and coated welded plastic with translucent quality and **high frequency sealed welding**.

TUNNEL HANDLE
TYPE A 2 joints

TUNNEL HANDLE
TYPE B 2 joints

TUNNEL HANDLE
TYPE C 1 joint

SHEATHS

These items are made by **high frequency welding tight** to ensure the hermetic closure. The sheaths serve as double protection. They are rolled up on a cardboard roll with 70 mm internal diameter.

SHEATH

SHEATH *wireless*

SHEATH *with wire*

From the design to the realized part of **Flexible Containment Accessories**

From the start of your project, **PIERCAN** brings you the right solution, via a controlled process – design, manufacturing, control – where quality is at the core of all processes.

THE DESIGN

• Engineering Office

Analyzes your requests and accompanies you in the search for the most suitable solution including choice of material, product development, and prototyping.

• Economic Optimization

The study of solutions integrates both quality factors, time and production costs, thus facilitating economic optimization of your project.

MANUFACTURING

• Cut

Scissors with circular blades and vibrating blades are used for semi-automatic cutting (unit cut to pattern, mattress format or a template).

• Weld

Made by high frequency welding which guarantees a perfect seal of the assemblies.

• Properties

Compatible with cleaning agents, decontamination and disinfection.

CONTROL IN THREE STEPS

1 • Incoming inspection of raw materials and tools with verification of design dimensions via our production management software.

2 • Control during production of physico-chemical parameters by the quality control laboratory and production parameters by the operators.

3 • Control of the finished product

- Sealing control
- Weld control
- Marking allowing the identification of the controlled part for total traceability.
